Attention of: Managing Director

Dear Sirs

Re: Temporary Platform 7 – Scaffold Construction & Decking

I wish to congratulate you and your team on an exemplary achievement in constructing the temporary Platform No 7 at Reading Station, in what was an extremely well planned co-ordinated team effort from delivery to completion within such a tight programme.

From inception right through the design, planning process, fabrication and on site construction, your team demonstrated a 'real want' to take this challenge on, nobody could fail to notice the extreme level of pride they felt in the delivery of the works. Anglewest Ltd working closely with Costain Hochtief JV, J&A Stevenson Ltd and NG Bailey Ltd achieved all Network Rail objectives and more in completing this project ahead of programme. In particular the introduction of the innovative "Yellow" tactile warning strip in lieu of the previously used buff tactile and separate painted yellow line reduced fabrication and possible future maintenance requirements.

I was particularly impressed at the way Anglewest Ltd co-operated with other trades and contractors, given the fast pace and changing programme of the works, particularly towards the end of the shutdown.

I would not hesitate to recommend Anglewest Ltd for future works.

Yours Sincerely

James McWhirter

Senior Construction Manager (Station).
